

Hiller-US LLC USA GOES MOBILE

HILLER Test Plant – Fast and Efficient:

With a fleet of mobile pilot and test plants Hiller provides customers all around the world new testing procedures and processing concepts that allow Hiller test technicians to acquire process data and generate optimal process solutions during continuous operation.

Now Hiller-US Separation & Process LLC based in Lampasas, Texas will also be able to provide on-site testing services featuring a brand new mobile plant equipped with the all new Hiller Model DP484.

The new Hiller DecaPress range with its exclusive direct drive gearbox system offers superior energy efficiency and reduced power consumption. This new generation machine also features much higher production capacities as well as higher solid contents all while using less polymer.

This mobile test plant is equipped with the latest technology so it can be optimally integrated into the process as a replacement system with minimal effort in just a few hours.

This Fall come see the DP484 in action as she makes a multi stop national demonstration tour

Call or watch for the dates & locations to be posted on our website
